Overview

Serandib Singlish Word Processor

is a **free software** that allows you to easily type sinhala words with your computer.

You can now type sinhala in anywhere easily with this .The main benifit is that you have to type sinhala word as you read them in english that we call sms type.

Most of nowadays softwares are only allow you to type sinhala words in Unicode type(Standard Sinhala letters that can be recognized in any modern computer all over the world).

But the disadvantage with this is you can't add styles like Bold,Italic or you cant even change the font style.

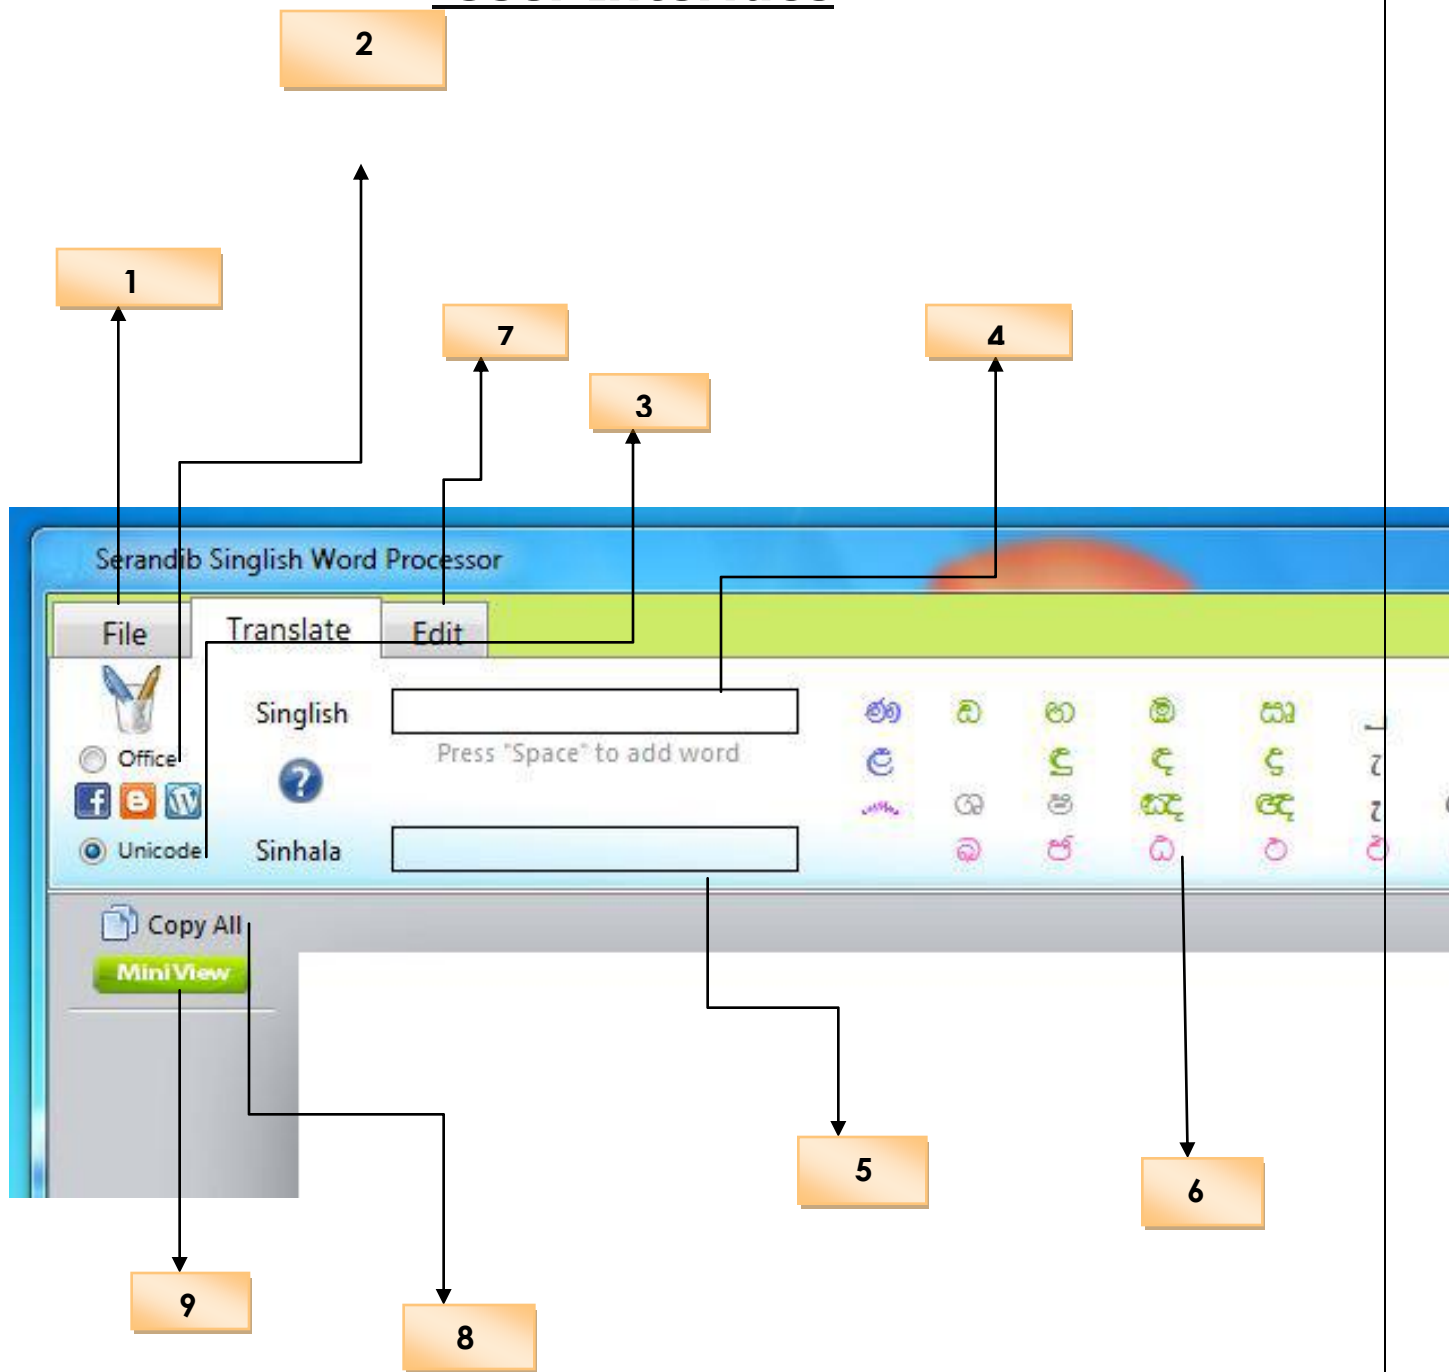

Because of these reasons you can't use this unicode text for a office document.Because you can't work with styles.

But **Serandib Singlish Word Processor** is came up with a **Office mode** that you can eventype sinhala words without unicode type.It will help you to work with many office documents.Not only the Office mode but also this has the Unicode mode.So you can do two things at one place.

So secondly thanks for installing this **Serandib Singlish Word Processor** in your computer.

You can go through the next help tips for getting famliar with this.

User Interface

1 – File tab

2 – Office Mode button

3 – Unicode Mode button

Sinhala Typing Help Guide

Let's look how you can write Sinhala in singlish way...

අ a

ආ aa

ඇ ae

ඈ aee

ඉ i

ඊ ii

උ u

ඌ uu

ඍ e

ඎ ee

ඏ ආ ai

ඐ o

එ ඊ oo

ඒ උ au

When you type any other letter you have to add these letters to
The end of them as you can read.

ක් -k	ක -ka	කා -kaa
කෑ -kae	කෑ -kaee	කි -ki
කී -kii	කෙ -ke	කේ -kee
කො -ko	කෝ -koo	කු -ku
කූ -kuu	කො -kau	කු -kra
කා -kraa	කෑ -krae	කෑ -kraee
කො -kro	කෝ -kroo	කි -kri
කී -krii	කෙ -kre	කේ -kree
කා -kru	කා -kruu	කෙ -kai
කං -kang		

Use Capital letters to write "Mahaprana" and "Murthaja" letters .

ඛ-Ka ඡ-CHa ජ-Ta ච-THa ඵ-Pa
 ඝ-Ga ඨ-DHa භ-Ba ඞ-Na ළ-La

ശ - sha

ശ - SHa

To print "Yansaya" type "ya" after the letter.

For Ex : ശയാ - shya

തയാ - thyaa

Note: If you type "yansaya" it might not be properly display in this software . But don't panic. It will properly display on any other Place without doubt.

To print "Bindhuwa" type "ng" after the letter.

For Ex : ബിം - ang

ഗം - gang

Let's look at some other letters.

ද - dha

යි - y

තෙ - thrai

ප් - pra

Note: If you type " ප් - pra" it might not be properly display in this software . But don't panic. It will properly display on any other Place without doubt.

Some words cannot be write with your direct keyboard out put.So you Can write the through additional letters.You can click that letters to add them to the TextField.

Ex : මඤ්ඤාක්කා ma#09#16#09#20kkaa
කොම්පඤ්ඤවීදිය kompa#09#16#09wiidhiya

Note : Above all features can be use when you're using Unicode mode.But some of that features are'nt applicable for office mode.In Office mode you can create complex letters easily through the additional letters pane.

You can Keep Update with our [SerandibSoft](#) Website.
